CMCT

Important Information

Assets Owned and Operated (AOO) represents the aggregate assets owned and operated by CIM on behalf of partners (including where CIM contributes alongside for its own account) and co-investors, whether or not CIM has discretion, in each case without duplication. AOO includes total gross assets at fair value, with real assets presented on the basis described in "Book Value" below and operating companies presented at gross assets less debt, as of the Report Date (as defined below) (including the shares of such assets owned by joint venture partners and co-investments), plus binding unfunded commitments. AOO also includes the \$0.3 billion of AOO attributable to CIM Compass Latin America (CCLA), which is 50% owned and jointly operated by CIM. AOO for CMMT Partners, L.P. (CMMT) (which represents assets under management), a perpetual-life real estate debt fund, is \$0.7 billion as of the Report Date.

Report Date is defined to mean as of March 31, 2019.

Book Value for each investment generally represents the investment's book value as reflected in the applicable fund's unaudited financial statements as of the Report Date prepared in accordance with U.S. generally accepted accounting principles on a fair value basis. These book values generally represent the asset's third-party appraised value as of the Report Date, but in the case of CIM's Cole Net-Lease Asset strategy, book values generally represent undepreciated cost (as reflected in SEC-filed financial statements).

Equity Owned and Operated (EOO) represents the NAV (as defined below) before incentive fee allocation, plus binding unfunded commitments, which is \$17.8 billion as of the Report Date, inclusive of \$0.3 billion of EOO attributable to CCLA (as described above) and \$0.7 billion of EOO for CMMT (which represents equity under management). For calculating the Book Value for CIM IV, the underlying assets of CMCT are assumed to be liquidated based upon the third-party appraised value of such assets. CIM does not view the price of CMCT's publicly-traded shares to be a meaningful indication of the fair value of CIM IV's interest in CMCT due to the fact that the publicly-traded shares of CMCT represent approximately 10% of the outstanding shares of CMCT and are thinly-traded.

Net Asset Value (NAV) represents the distributable amount based on a "hypothetical liquidation" assuming that on the date of determination that: (i) investments are sold at their Book Values; (ii) debts are paid and other assets are collected; and (iii) appropriate adjustments and/or allocations between equity partners are made in accordance with applicable documents, as determined in accordance with applicable accounting guidance.
